

A TIME MACHINE FOR BUILDING PEACE

With a mission to promote Peace, equality, and global understanding through an immersive journey that explores the incredible story of our planet, The Little Museum of the World is an outstanding educational place at the heart of Hong Kong with a phenomenal density of fascinating and meaningful artifacts. A combination of a physical museum location and mobile outreach workshops.

The Little Museum of the World is a unique museum concept that takes visitors on a captivating journey through the history of our planet. This new place combines education and entertainment while standing out by offering a distinctive and emotionally resonant experience focused on humanity and respect. This is a concept that has never been seen before anywhere else in the world, the fruit of a deep passion for the planet that led its creator to explore and share the realistic possibilities of building a better world. "You can only protect what you know," says Christian Pilard, founder of The Little Museum of the World.

#### a museum of imagination
